

Brisbane Diamantina Health Partners (BDHP) provides a platform for greater integration and collaboration between clinicians, educators, researchers and academics. BDHP is designated as an Advanced Health Research and Translation Centre (AHRTC) by the National Health and Medical Research Council (NHMRC).

Our Vision

Improved population health outcomes through collaborative partnerships that translate discoveries and knowledge into practice

Our Mission

To enable the integration of innovative research with education, training, clinical care and the highest quality healthcare

Our Shared Values

Clinical and academic excellence
Collaboration and integration
Innovation and implementation
Inclusiveness and openness
Respect, integrity, trust and accountability

Our Objectives

Excellence in research, education, clinical care

Enable excellence, innovation in research, education, workforce development, clinical care, and service delivery in healthcare

Interdisciplinary collaboration

Draw on our collective strengths and scale to enable a collaborative, integrated approach to accelerate the translation of research into education and healthcare practices

Improved health outcomes

Translate research and evidence into excellent patient-centred care which improves the quality of life and health outcomes for our populations

Health System Sustainability

Enable cross-sectoral collaboration and investment to ensure sustainability of the health system

Our Strategic Goals

Health System Improvement

- Increase value-based and evidence-based care
- Improve reliability and standardisation of care
- Improve transitions of care and connections to primary care
- Prevention and early intervention
- Reduce avoidable hospital demand
- Improve health workforce wellbeing
- Improve the capacity and capability of the clinical research workforce to enable multidisciplinary effort and translation

Healthcare Equity

Focus on:

- Social determinants of health
- Aboriginal and Torres Strait Islander populations
- Ageing and aged care
- Improving access to health services for vulnerable populations and those most at risk

Consumer and community involvement

Strengthen consumer, community and clinician collaboration and engagement in priority setting, research and translation of research into practice

Data and technology

- Improve data collection, data platform, linkage and analytics
- Expand the use of innovative technologies to deliver care
- Improve connectivity to increase integrated care

High-Performing Partnerships

- Decision-making that reflects state and national health research priorities
- Clear governance and commitment to how the partners work together
- United advocacy and influence as a partnership
- Program management and operational capability which supports clinicians, researchers and academics to deliver agreed outcomes

Themes Translating Research

Ageing

Brain and
Mental Health
